

MAURER

***Maurer Rides certified
maintenance and service technician***

**Training Seminar of qualified specialist staff for admittance of execution of
annual inspections for the whole vehicle and locking system
at your ride CSC / SC 2000 / SC3000
at our plant in Munich**

Scope of Training:

- Theoretical training
- Practical training at an original vehicle (disassembly from complete vehicle)
- Test at an original vehicle
- Certificat as qualification confirmation
- Food supply (5 x lunch)

In detail we explain and train:

- annual inspection of car locking system
- Assembly an disassembly of axles, wheel housings, balancer beam, lap bar, wheels, fixing brake, centrifugal brake, support roller, unlocking system, pickups and switches, brake fin, function chain hook and backstop.

The following item is not included the price:

- Travelling expenses and accommodation

Training time: to agreements

Training period: approx. 35 hours (4,5 days)

Training costs: feel free to order a individual offer from us

The training is carried out by Maurer Söhne only in the plant at Munich. The training is person-related and not transferable. Trained persons are authorized to carry out the annual inspections at the locking units of the cars CSC / SC 2000 / SC3000 demanded by the security services independently.

Annual inspections at the locking units only may be carried out by the manufacturer, TÜV authorities or persons trained or under their supervision. Persons with inspection certificate aren't authorized to train further persons or to certify. Qualified staff can be trained either by the manufacturer or by the TÜV authority.
